Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 and 9-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the production" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the type" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3721

Claim 1 recites the limitation "the capsule bodies" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the lids" in lines 6 and 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the quantities" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the volume" in line 13. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (Background of the invention) in view of Trebbi (U.S. Patent No. 6,327,835).

Applicant has admitted that a capsule filling machine is old and well known (Background Art; specification page 1, lines 12-21). The admitted art does not disclose detecting means to check out quantity of pharmaceutical material filled into the capsule body. However, Trebbi discloses a similar machine with the use of detecting means to check out quantity of material filled into capsules body (Fig. 1; column 7, lines 43-61 and abstract).

Art Unit: 3721

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified applicant's admitted prior art by the use of detecting means, as suggested by Trebbi, in order to control and measure the exact needed quantity to the capsules.

Regarding claims 2-5 and 9-12: Trebbi discloses the use of detecting means/checking means comprise checking disc, chambers, transducer means, closing and opening bottom of the chamber, control and processing unit, see for example (Figs. 1 and 2).
